No homework “due” in the sense that nothing needs to be turned in this week.

1. Prepare for the mid-term examination. In particular, review Chapters 1–4, and Sections 5.1–5.7, 6.1 and 6.7 from Stark and Woods, and pages 1–73 and 81–90 from Prof. Papamarcou’s notes.

2. After the examination, please read Chapter 6, pp 334–375 and 383–388. It is very important that you read the detailed examples worked out in the textbook in order to solidify your grasp of the concepts discussed in class.

Best of luck for the examination.
