Review Chapter 6 of Stark and Woods (once again) before starting the homework.

2. Solve problem 6.31 from Stark and Woods.

*Please* finish reading Chapter 7 after doing the homework. We are somewhat behind in the material we need to cover. Since Chapter 7 is conceptually very similar to Chapter 6, with discrete time replaced by continuous time, I intend to assign most of Chapter 7 for *self study*. If you read it now, while we are still on Chapter 6, you will have an opportunity to see the two side by side, and bring up any (subtle) differences for discussion in class.
